

## Expansion of Evonik's DL-methionine production capacity in Singapore moves to next stage

July 25, 2023

- Expansion of DL-methionine production facility progressing as expected in Singapore
- Reduced production in Singapore in Q4/2023 and for three months in H1/2024 due to expansion shutdowns
- Investment will boost production capacity and secure long-term global supply of MetAMINO®

**Essen, Germany.** Evonik is making progress with the expansion of its DL-methionine production plant in Singapore: In order to reach an important milestone in the construction process, production at the Singapore plant on Jurong Island will be reduced for three months in Q4/2023, followed by another three-month tie-in shutdown in the first half of 2024.

This shutdown is part of the implementation of Evonik's methionine asset strategy to safeguard long-term global supply security. The expansion is proceeding as expected and the planned production stops in Q4/2023 and H1/2024, which are necessary for maintenance and safety reasons, will allow modifications to be made that would not be possible during day-to-day operations.

"We fully understand that these shutdowns may pose challenges for our customers and our teams have prepared mitigation plans for MetAMINO® supply from our global production network. We are in continuous communication with regional and global customers to carefully plan shipments", says Noel Kim, Regional Vice President Animal Nutrition.

Earlier this year, Evonik announced a high double-digit million euro investment to boost production capacity of MetAMINO® (DL-methionine) on Jurong Island, Singapore, by 40,000 metric tons per year to around 340,000 metric tons per year. The expansion will improve the efficiency of the facility's processes and reduce the carbon footprint of all Evonik's MetAMINO® production in Singapore by six percent (Scope 1+2+3).

Methionine is used in livestock production to feed animals healthily, efficiently, and sustainably. With its science-based approach, the Animal Nutrition business line of Evonik develops products, services and system solutions that help supply a growing world population with healthy, high-quality and affordable animal protein. Animal Nutrition is part of Evonik's Nutrition & Care Division and contributes significantly to the profitable growth of Nutrition & Care through its self-financing power.

### **Company information**

Evonik is one of the world leaders in specialty chemicals. The company is active in more than 100 countries around the world and generated sales of €18.5 billion and an operating profit (adjusted EBITDA) of €2.49 billion in 2022. Evonik goes far beyond chemistry to create innovative, profitable and sustainable solutions for customers. About 34,000 employees work together for a common purpose: We want to improve life today and tomorrow.

### **About Nutrition & Care**

The focus of the business of the Nutrition & Care division is on health and quality of life. It develops differentiated solutions for active pharmaceutical ingredients, medical devices, nutrition for humans and animals, personal care, cosmetics, and household cleaning. In these resilient end markets, the division generated sales of €4.24 billion in 2022 with about 5,700 employees.
