FOREWORD.

Implementing sustainability

WE GO BEYOND – Enabling transformation and going beyond the known, that is the key to a sustainable world for us. At Evonik, we have been on this path for a long time and are paving it with our passion for outstanding products and technologies. Competitiveness and sustainability complement each other to form a future-proof business model: the more resource-efficient, the more profitable and the more innovative, the more future-proof. We are convinced of that. It is precisely for this reason that we are implementing our sustainable corporate strategy under the heading Next Generation Evonik at a time when our business and our society are being challenged by geopolitical, ecological and social crises.

In 2023, our focus was on our three most important sustainability topics: Green Energy, Portfolio Transformation and Circular Economy. Through four focus projects, we show how we are working with our partners to contribute to a more sustainable world.

Evonik is also committed to the goals of the Paris Climate Agreement. We underline this with our commitment to the Science Based Targets initiative (SBTi) and ambitious targets to reduce our CO₂ emissions (Scope 1, 2 and 3).

We support the implementation of the Sustainable Development Goals (SDGs) and have been intensively examining our own positive and negative contributions for several years. We have published examples of the positive contributions of our products and solutions to the implementation of the SDGs on our [website](#).

We present detailed information on the above topics in our current [sustainability report](#) entitled "Implement".

WHO WE ARE

Evonik is one of the world's leading specialty chemicals companies with operations in more than 100 countries. Our strengths include a balanced spectrum of business activities, end-markets, and regions, and working closely with customers.

Often, we only contribute small amounts to our customers' products and solutions, but they make a real difference. Because Evonik makes tires more fuel-efficient, PU mattresses recyclable, medical implants bioresorbable, and animal feed more sustainable.

FIVE KEY STATEMENTS ON SUSTAINABILITY AT EVONIK.

1 Our purpose

We aspire to create sustainable, value-added solutions for our customers. That promise is expressed in our purpose: Leading beyond chemistry to improve life, today and tomorrow. We lead beyond chemistry by networking competencies, perspectives, and partners.

2 Next Generation Evonik

We have integrated sustainability comprehensively into our corporate strategy—from research & development through portfolio management to our corporate culture. The core process is the sustainability analysis of our business. Research & development play a key role in the ongoing transformation of our portfolio. In 2023, Evonik generated additional sales of over €650 million with, among others, innovative solutions for health, cosmetics, and membranes (reference base 2015) [sustainability report, p.29.](#)

3 Next Generation Solutions (handprint)

We already generate 43 percent of our sales with products and solutions that have a strongly positive sustainability profile. We aim to increase the proportion of sales generated with these Next Generation Solutions to over 50 percent by 2030 [sustainability report, p.23.](#)

4 Next Generation Technologies (footprint)

Evonik supports the objectives of the Paris Agreement on Climate Change. This is underscored by our commitment to the Science Based Targets initiative (SBTi). Between 2021

and 2030, we aim to reduce our scope 1 and 2 emissions by 25 percent. For the reduction in our scope 3 emissions, we are committed to a target of –11 percent¹. Our targets are aligned to the SBTi target level of “well below 2°C.”

[sustainability report, p.17.](#)

5 Next Generation Culture (heartprint)

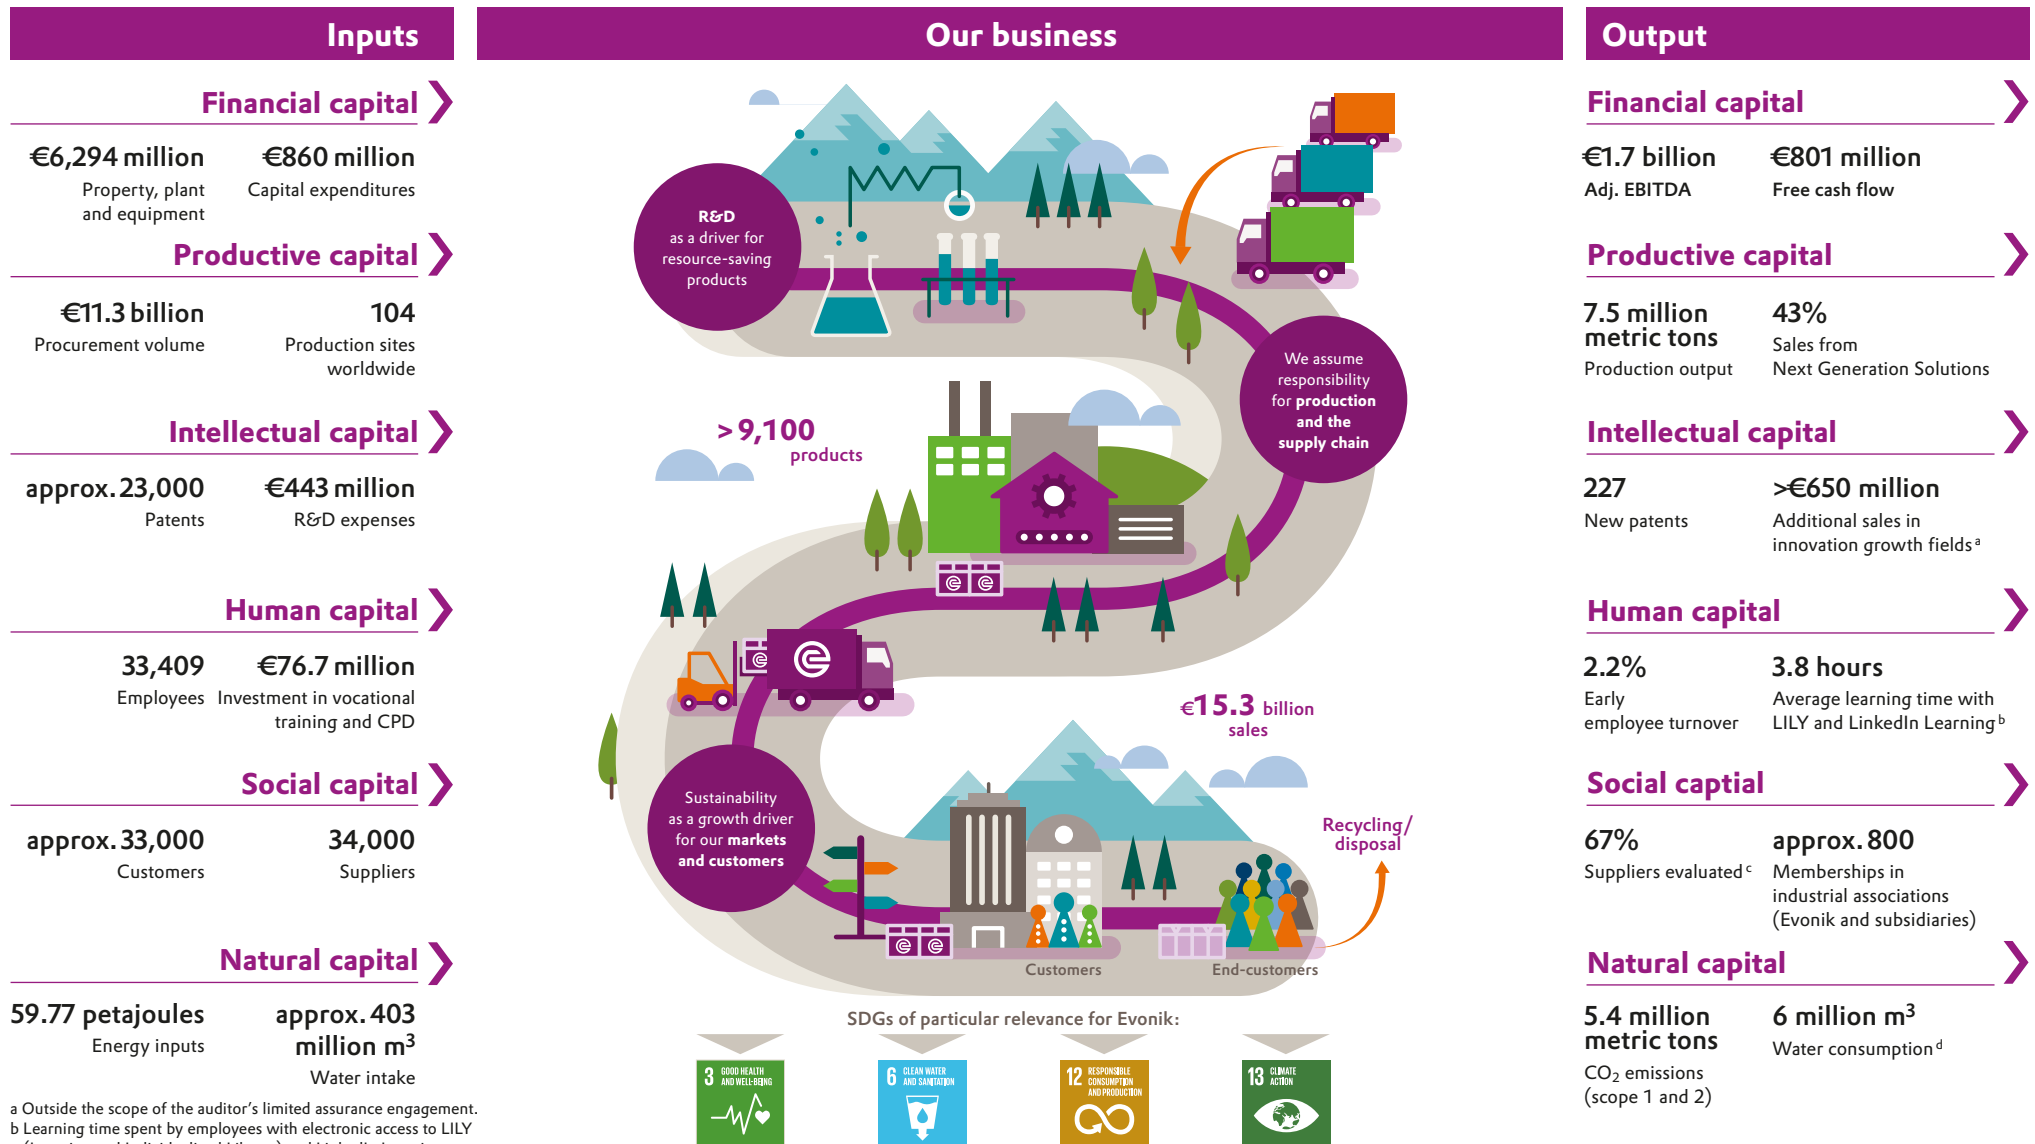

We integrate sustainability into our human resources processes at all levels, from recruitment through vocational training and continuing professional development to engagement programs and remuneration [sustainability report, p.17.](#)

Sustainability is the backbone of our purpose and our strategy

¹ Exact target: 11.07 percent.

RESOURCES AND VALUE ADDED AT A GLANCE.

^a Outside the scope of the auditor's limited assurance engagement.

^b Learning time spent by employees with electronic access to LILY (Learning and Individualized Library) and LinkedIn Learning.

^c TFS assessments of suppliers where annual procurement volume is > €100 thousand.

^d For further water data, see [sustainability report](#), p. 59.

MEASURABILITY OF OUR SUSTAINABILITY ACTIVITIES.

The sustainability analysis of our business is based on the framework for Portfolio Sustainability Assessment (PSA) developed by the World Business Council for Sustainable Development (WBCSD).

Evonik was involved in developing this method from the beginning. The PSA uses signal categories that reflect the value chains of our businesses and take account of sustainability aspects from the supply chain through production to subsequent use.

Evonik has divided its portfolio into 531 PARCs. PARC stands for product-application-region combination and relates to a differentiated assessment of a product group with reference to its application and region. The sustainability performance determined in this way is examined along three axes (product, region, application).

NEXT GENERATION SOLUTIONS AND THEIR HANDPRINT.

We define **handprint** as the positive impacts of our products along the value chain compared with other established products and applications on the market, especially in the usage phase in customers' applications.

Our Next Generation Solutions already account for **43 percent** of our sales. By 2030, we want to raise that to more than 50 percent.

NEXTGEN Solutions

Outstanding products in Evonik's portfolio that ...

- ... deliver **above-average growth**
- ... meet **rising customer demand** for sustainable solutions
- ... offer our customers **above-average sustainability benefits**

IMPLEMENTING OUR TOP 10 SUSTAINABILITY TARGETS.

Sustainability areas of action	Top 10 strategic targets for 2024 and beyond	Status 2023	Status 2022	
 Strategy and growth see  sustainability report 2023, p.13	» Portfolio transformation: <ul style="list-style-type: none"> Increase the proportion of sales generated with Next Generation Solutions to > 50 percent by 2030 Proportion of sales from challenged products should be permanently < 5 percent 	43% 2%	43% 2%	
 Value chain and products see  sustainability report 2023, p.28	» Generate at least €1 billion in additional sales with circular products and technologies by 2030	--	-- ^a	
 The environment see  sustainability report 2023, p.46	» Reduce absolute greenhouse gas emissions <ul style="list-style-type: none"> Scope 1 and 2 by 25 percent between 2021 and 2030 Scope 3^b by 11 percent^c between 2021 and 2030 » Reduce both absolute and specific energy consumption by 5 percent between 2020 and 2025 » Reduce specific freshwater intake by 3 percent between 2021 and 2030 » Reduce the specific volume of production waste by 10 percent between 2021 and 2030	-15% -17% -8% absolute +10 specific +12% +8%	-6% -7% -1% +/-0% +6% +2% ^d	
 Employees see  sustainability report 2023, p.85	» Proportion of women and intercultural mix <ul style="list-style-type: none"> Proportion of women in top management should be 23 percent at each level by 2026 Proportion of women in senior management should be 23 percent at each level by 2026 Intercultural mix^e at executive level should be 20 percent by 2026 » Learning time per employee per year in LILY and LinkedIn Learning >3 hours by 2026	22.2% 18.5% 18.4% -	17.1% 17.1% 15.8% -- ^a	
 Safety see  sustainability report 2023, p.102	» Occupational and plant safety: <ul style="list-style-type: none"> Lost time injury rate (LTI-R) ≤ 0.26 Process safety incident rate (PSI-R) ≤ 0.40 	0.21 0.43	0.25 0.49	
 Governance and compliance see  sustainability report 2023, S.110	» 100 percent of all raw materials suppliers where annual procurement volume is > €100 thousand to be covered by Tfs assessments by year-end 2025^f	66.7%	66%	

You can find a full overview of the status of our sustainability targets for 2023 in the  sustainability report 2023, p.146. | You can find an overview of the main sustainability indicators used for the Evonik Group in the  sustainability report 2023, p.142. | ^a New target set in 2023. | ^b Scope 3 emissions from all upstream categories and the category "Downstream transportation and distribution." | ^c Exact target: 11.07 percent. | ^d Relative to production volume. | ^e Employees whose nationality is not German. | ^f Annual procurement volume > €100 thousand.

CONSOLIDATED SUSTAINABILITY INDICATORS FOR THE EVONIK GROUP.

The following tables are an overview of Evonik's principal company-specific KPIs. The structure is aligned with Evonik's six areas of action. **The 15 material topics** are highlighted **in color**. For more detailed information, please go to the relevant chapters in this report.

Sustainability indicators 2023^a

 Strategy and growth ☐ sustainability report 2023, p.13	Unit of measurement	2021	2022	2023
Production	in million metric tons	9.5	8.4	7.5
Production sites worldwide	n	102	104	104
Sales	in € billion	14.9	18.5	15.3
Adjusted EBITDA	in € million	2,383	2,490	1,660
Net income	in € million	746	540	-465
Portfolio transformation				
Proportion of sales from Next Generation Solutions	in %	41	43	43
CO ₂ e avoided by using Evonik products ^b	in million metric tons CO ₂ e	39	44	48
 Value chain and products ☐ sustainability report 2023, p.28	Unit of measurement	2021	2022	2023
Research & development				
R&D expenses	in € million	464	460	443
Ratio of R&D expenses to sales	in %	3.1	2.5	2.9
No. of new patent applications filed	n	280	256	227
Circular economy				
Proportion of renewable raw materials	in %	9.7	11.1	12.0
Proportion of RSPO-certified palm (kernel) oil in the RSPO accounting period (September 1, 2022 through August 31, 2023)	in %	-	-	60
Product stewardship				
Breaches of product labeling regulations	n	0	0	0

^a Differences between the data and totals are due to rounding.

^b In 2021, 4 products with sales of €1.8 billion were evaluated.

In 2023, 5 further products were added, bringing the total evaluated to 11 products with sales of €1.3 billion.

^c For details, see ☐ sustainability report 2023 in the chapter "The environment", p.53.

^d Emissions from production and energy generation.

^e Emissions of ozone-depleting substances calculated in accordance with the Montreal Protocol.

 The environment ☐ sustainability report 2023, p.46	Unit of measurement	2021	2022	2023
Mitigating climate change				
Evonik Carbon Footprint^c				
Scope 1: Direct energy- and process-related emissions	in million metric tons CO ₂ e	4.4	4.2	3.8
<i>thereof methane^d</i>	in million metric tons CO ₂ e	13	22	21
Scope 2: Indirect emissions from purchased energy (gross, market-based approach)	in million metric tons CO ₂ e	1.9	1.8	1.5
Scope 3: Upstream and downstream emissions	in million metric tons CO ₂ e	23.4	20.5	19.2

STATUS OF OUR SUSTAINABILITY TARGETS FOR 2023.

This table shows the targets we set for the reporting period. The traffic lights show progress towards achieving the targets. You can find details of the exact status in the sustainability report in the relevant chapters and in the table “Sustainability indicators for the Evonik Group” [S. 142](#).

Target attainment in 2023

Strategy and growth [sustainability report 2023, p. 13](#)

- Increase the proportion of sales generated with Next Generation Solutions to over 50 percent by 2030
- Proportion of sales from challenged products should be permanently below 5 percent

Value chain and products [sustainability report 2023, p. 28](#)

- Generate more than €1 billion in additional sales^a in our six innovation growth fields by 2025
- Generate more than €350 million in additional sales with solutions for the circular plastics economy from 2030
- Solutions for around 400,000 metric tons of recyclable plastics by 2025
- Add substances/products from acquisitions^b to CMS/CMS^{PLUS} and process them by the end of 2023

The environment [sustainability report 2023, p. 46](#)

- Reduce absolute scope 1 and scope 2 emissions by 25 percent between 2021 and 2030
- Reduce absolute scope 3 emissions^c by 11 percent^d between 2021 and 2030
- Reduce both absolute and specific energy consumption by 5 percent between 2020 and 2025
- Switch purchased electricity to 100 percent green electricity by 2030
- Reduce specific freshwater intake by 3 percent relative to production volume between 2021 and 2030
- Reduce the specific volume of production waste by 10 percent relative to production volume between 2021 and 2030

^a With products introduced in or after 2015.

^b Since 2017.

^c Scope 3 emissions comprise all upstream categories and the category “Downstream transportation and distribution.”

^d Exact target: 11.07 percent.

Employees [sustainability report 2023, p. 85](#)

- Proportion of women in top and senior management should be 23 percent at each level by 2023
- Intercultural mix at executive level should be 20 percent by 2023

Safety [sustainability report 2023, p. 102](#)
