## (2) General information

Evonik Industries AG is an international specialty chemicals company headquartered in Germany. It also has investments in residential real estate and the energy sector.

Evonik Industries AG is a subsidiary of RAG-Stiftung, Essen (Germany), which holds 74.99 percent of the shares in Evonik Industries. As a subsidiary of RAG-Stiftung, Evonik Industries AG and its subsidiaries are included at equity in the annual consolidated financial statements prepared by RAG-Stiftung in accordance with the German Commercial Code (HGB). The remaining 25.01 percent of the shares are held by Gabriel Acquisitions GmbH (Gabriel Acquisitions), Gadebusch (Germany). Gabriel Acquisitions is an indirect subsidiary of funds established and advised by CVC Capital Partners (Luxembourg) S.à r.l. (CVC), Luxembourg (Luxembourg).

The present condensed and consolidated interim financial statements (consolidated interim financial statements) of Evonik Industries AG and its subsidiaries (referred to jointly as Evonik or the Group) as of June 30, 2012 have been prepared in accordance with the provisions of IAS 34 Interim Financial Reporting, and in application of Section 315 a Paragraph 3 of the German Commercial Code (HGB) using the International Financial Reporting Standards (IFRS) and comply with these standards. The IFRS comprise the standards (IFRS, IAS) issued by the International Accounting Standards Board (IASB), London (UK) and the interpretations (IFRIC, SIC) of the IFRS Interpretations Committee (IFRS IC), as adopted by the European Union.

The consolidated interim financial statements as of June 30, 2012 are presented in euros. All amounts are stated in millions of euros (€ million) except where otherwise indicated. The basis for the consolidated interim financial statements comprises the consolidated financial statements for the Evonik Group as of December 31, 2011, which should be referred to for further information.

### (3) Accounting policies

The accounting and consolidation principles applied in these consolidated interim financial statements are the same as those used for the consolidated financial statements as of December 31, 2011. Exceptions are set out below.

The IASB has amended or issued a number of standards and interpretations. These have to be officially adopted into European law by the European Union before they can be applied. The accounting standards that had to be applied for the first time in fiscal 2012 do not significantly impact the consolidated financial statements or are not relevant for the consolidated financial statements:

- The amendments to IFRS 7 Financial Instruments: Disclosures concerning supplementary disclosure requirements for the transfer of financial assets.

In addition, in June 2012 two further standards were adopted into law by the European Union. These will become mandatory for the first time in fiscal 2013. These two standards will impact the consolidated financial statements as follows:

- The amendments to IAS 1 Presentation of Financial Statements: Presentation of Items of Other Comprehensive Income mainly affect the presentation of other comprehensive income after taxes.
- The amendments to IAS 19 Employee Benefits relate to the recognition and measurement of expense for defined benefit pension plans and termination benefits. Among other things, from fiscal 2013 the corridor method currently used by Evonik will no longer be applicable. This will increase the volatility of provisions and equity without impacting income. It will also increase the disclosure requirements on employee benefits. Further implications for the consolidated financial statements are currently being examined.

### (4) Restatement of prior-year figures

An enterprise may only change its recognition and valuation principles or the items stated in prior years if this is required due to a standard or interpretation or results in the disclosure of more relevant information in the financial statements. Such changes must generally also be presented retroactively for the prior period. For the present consolidated financial statements, the following prior-year figures have been restated:

The presentation of deconsolidation effects in other comprehensive income has been altered in the statement of comprehensive income and the statement of changes in equity. This increased other comprehensive income after taxes by €115 million. €24 million of this was attributable to shareholders of Evonik Industries AG and €91 million was attributable to non-controlling interests. €159 million of the increase in other comprehensive income was due to currency translation adjustments, while minus €34 million related to losses on hedging instruments and minus €10 related to deferred taxes.

In the segment report, slight adjustments to the regional reporting structure resulted in restatement of the prior-year figures, see Note (7).

### (5.2) Acquisitions and divestments

This section provides a more detailed overview of the changes in the scope of consolidation in the reporting period, divided into acquisitions and divestments.

#### Acquisitions

No acquisitions were made in the reporting period.

#### Divestments

On March 5, 2012 Evonik signed an agreement to divest its global Colorants business to a subsidiary of Arsenal Capital Management LP, New York (New York, USA). The transaction was closed on April 30, 2012. It comprised the assets and liabilities of companies located in the USA, Canada, Brazil, Australia, China, Malaysia and the Netherlands. Three subsidiaries were deconsolidated as a result of this divestment.

Until then, the Colorants business was part of the Resource Efficiency segment. It was agreed not to disclose the financial terms of the transaction.

### (5.3) Assets held for sale and discontinued operations

In addition to the divestments outlined in Note (5.2), the Executive Board of Evonik Industries AG has decided to divest various business operations. Where these divestment processes have not yet been completed, the businesses are still included in the consolidated financial statements. IFRS 5 Non-current Assets Held for Sale

and Discontinued Operations sets out the valuation and accounting principles to be used for such operations and their presentation in the consolidated financial statements.

The following table shows the main impact on the balance sheet. None of the businesses presented here meets the criteria for classification as discontinued operations.

A Chinese joint venture in the Specialty Materials segment was classified as held for sale for the first time as of June 30, 2012. As on December 31, 2011, assets held for sale also include those parts of the carbon black business that are to be sold separately.

The property management business of Evonik Wohnen GmbH (Evonik Wohnen), Essen (Germany), which was included here as of December 31, 2011, was transferred to Vivawest Wohnen GmbH (Vivawest Wohnen), Essen (Germany), on January 1, 2012. Vivawest Wohnen is a joint venture of Evonik and THS. Assets of €3 million and liabilities of €72 million were transferred to this company on this date. The resultant payment obligation basically corresponds to the net value of the carrying amounts transferred and was settled by June 30, 2012. The property management business was part of the Real Estate segment until its transfer. The impact of the transfer on this segment's financial indicators is outlined in Note (7).

Post-divestment income and expenses resulted from past transactions relating to businesses previously classified as discontinued operations.

## (6) Notes on business performance

In line with the terminology used by peers, from the start of 2012 the non-operating result, EBITDA (before non-operating result) and EBIT (before non-operating result) were changed to adjustments, adjusted EBITDA and adjusted EBIT, without altering the composition of these items. In addition, further adjusted indicators are calculated, including adjusted net income.

### (6.1) Earnings position

The Evonik Group's operating performance in the first half of 2012 was pleasing, although a slight deterioration in demand was registered in some areas of business towards the end of the second quarter, especially in Europe. Sales totaled €6,935 million in the first six months. This represents flat organic sales growth compared with the previous year: Higher selling prices (+2 percentage points) offset lower volumes (-2 percentage points). As a result of other effects totaling minus 10 percentage points—principally due to the deconsolidation of the carbon black business following its divestment in July 2011—and positive currency effects (+2 percentage points), sales declined by 8 percent overall.

| Other effects (especially carbon black) | -10%       |
| <b>Total</b>                            | <b>-8%</b> |

The operating results were below previous year's high level due to a slight dip in demand and the fact that the prior-year figures still contained earnings from the carbon black business. Overall, adjusted EBITDA slipped 9 percent to €1,366 million, while adjusted EBIT declined 10 percent to €1,049 million. The adjusted EBITDA margin was 19.7 percent, in line with the very good level reported for the first half of 2011 (19.8 percent).

The following table contains a reconciliation from adjusted EBITDA to net income:

The adjustments totaling minus €81 million mainly comprised impairment losses on assets at a production site in the Resource Efficiency segment as a result of the tough competitive situation in the photovoltaics industry. The principal component of restructuring is expenses for ongoing corporate projects. Other mainly comprises an expense of €7 million in connection with the recognition of the put and call options for the remaining shares in STEAG GmbH (STEAG). These options are remeasured every quarter. The prior-year figure of minus €121 million principally comprised expenses and impairment losses in connection with divestments. It also included income of €42 million from the measurement of the put and call options.

Prior-year figures restated.

Net interest expense was reduced to €175 million thanks to lower interest expense on financial liabilities. Income before income taxes from continuing operations declined by 7 percent to €793 million. Income before income taxes from the discontinued operations was €14 million and mainly comprised post-divestment income from non-core operations sold in prior periods. The prior-year figure of minus €46 million mainly comprised expenses in connection with the divestment of 51 percent of the shares in STEAG. Total income before income taxes was €807 million, around the previous year's figure. The income tax rate was 35 percent,

which was above the expected Group tax rate of 30 percent, mainly due to current losses and impairment losses that are not tax-deductible. The non-controlling interests of minus €9 million essentially comprised the pro rata losses made by a joint venture. The prior-year figure of €16 million mainly contained non-controlling interests relating to the former STEAG companies. Net income grew by 2 percent year-on-year to €533 million. Since adjusted net income should reflect the development of operating earnings, the impact of adjustments and of discontinued operations is reversed in this item. This had a negative impact of €69 million in the reporting period, compared with a negative impact of €240 million a year earlier. Adjusted net income therefore dropped 21 percent to €602 million.

## (6.2) Segment performance

The Consumer, Health & Nutrition segment grew sales 6 percent year-on-year to €2,086 million as a result of slightly higher volumes and selling prices, and positive currency effects. The operating results were slightly above the very good level reported for the first half of 2011: Adjusted EBITDA increased by 1 percent to €543 million, while adjusted EBIT rose 2 percent to €481 million. The EBITDA margin was 26.0 percent, below the previous year's level of 27.1 percent.

The Resource Efficiency segment reported a 31 percent drop in sales to €1,651 million, mainly due to the divestment of the carbon black business at the end of July 2011. Disregarding the carbon black business, sales slipped 2 percent, principally because volumes were lower. The operating results declined due to a dip in demand and because earnings from the carbon black business were no longer included. Overall, adjusted EBITDA declined by 27 percent to €340 million, while adjusted EBIT dropped 32 percent to €266 million. The adjusted EBITDA margin rose to 20.6 percent, up from 19.7 percent in H1 2011. Here it should be noted that the figures for the first half of 2011 still included the carbon black business, where the adjusted EBITDA margin was below-average.

In the Specialty Materials segment sales were virtually unchanged year-on-year at €2,503 million. The production shortfall caused by the fire at the CDT plant in Marl, combined with a reduction in demand, especially from Europe, resulted in lower volumes than in the first half of 2011, but this was offset by higher selling prices and positive currency effects. In the operating results, the drop in earnings resulting from the fire was essentially offset by insurance. Most of the insurance payments are included in other operating income. Due to the decline in demand, the operating results were below the previous year's very good level: Adjusted EBITDA fell 5 percent to €452 million, while adjusted EBIT declined by 6 percent to €375 million. The adjusted EBITDA margin therefore dropped from 19.1 percent in H1 2011 to 18.1 percent in H1 2012.

The Services segment's sales totaled €1,358 million. Internal sales with the chemicals segments and Corporate Center accounted for €857 million of the total. External sales rose 6 percent to €501 million. The operating results improved, principally thanks to higher earnings from Site Services: Adjusted EBITDA increased by 11 percent to €97 million, while adjusted EBIT was up 15 percent at €54 million.

Since January 1, 2012, the operational management of the Real Estate segment's property holdings has been assigned to Vivawest Wohnen GmbH, a joint venture with THS. To this end, leasing agreements were concluded between Vivawest Wohnen (lessee) and the companies that own the real estate (lessors). Since Vivawest Wohnen is included at equity, sales from rental business are no longer recognized. Instead, the rental revenues of the fully consolidated owners are recognized after deducting the attributable management expenses. Sales therefore declined by about 50 percent to €100 million. The operating results were lower than in the previous year, when they included a one-off effect of €20 million from the revaluation of deferred tax assets in the at-equity earnings of THS. As a consequence, adjusted EBITDA decreased by 23 percent to €87 million, while adjusted EBIT declined by 28 percent to €64 million.

### (6.3) Financial condition

The net financial debt shown on the balance sheet was €1,302 million, an increase of €459 million compared with year-end 2011. This was principally due to high capital expenditures and the dividend of €425 million for 2011, which was paid in April 2012. The cash flow from operating activities had a counter-effect.

Net financial debt is calculated as follows:

| in € million                        | June 30,<br>2012 | Dec. 31,<br>2011 |
|-------------------------------------|------------------|------------------|

| <b>Net financial debt</b>           | <b>-1,302</b>    | <b>-843</b>      |

\* Excluding liabilities and receivables from derivatives.

The cash flow from operating activities in the continuing operations amounted to €389 million, which was almost the same as a year earlier (€400 million). In the previous year, the cash outflow from operating activities in the discontinued operations of €93 million related to the former Energy Business Area. Overall, the cash flow from operating activities increased by €82 million to €389 million.

The cash flow for investing activities comprised an outflow of €605 million, compared with an inflow of €193 million in the first half of 2011. Capital expenditures and investment in shareholdings amounted to €417 million (H1 2011: €412 million). The cash inflow in the first half of 2011 was mainly due to the proceeds from the divestment of shareholdings, principally the divestment of 51 percent of the shares in STEAG, which totaled €206 million, and to securities, deposits and loans amounting to €377 million, which were held for

short periods as part of the asset investment strategy. By contrast, in the first half of 2012 €209 million was invested in securities, deposits and loans.

#### **(6.4) Asset structure**

Total assets increased slightly to €17.0 billion. Non-current assets were unchanged at €11.0 billion. Current assets rose slightly to €6.0 billion, mainly because inventories and trade accounts receivable increased, while cash and cash equivalents declined, principally as a result of the dividend payment.

Equity increased by €0.1 billion to €6.2 billion. The equity ratio improved from 35.8 percent to 36.6 percent.

### **(7) Notes on the segment report**

The Executive Board of Evonik Industries AG decides on the allocation of resources and evaluates the earnings power of the Group's operations on the basis of the operating segments described below (subsequently referred to as segments). The operating activities are divided into business units within the segments. The reporting based on segments reflects the Group's internal organizational and reporting structure (management approach).

In accordance with its strategic focus on specialty chemicals and to align the regional allocation of companies and business operations to its peers, the Executive Board of Evonik Industries AG has taken the following decisions that affect the segment reporting:

- The Real Estate segment, which Evonik intends to divest entirely in the medium term, comprises Evonik's portfolio of residential real estate and its 50 percent stake in THS. Effective January 1, 2012, Evonik and THS bundled the management of their residential properties in the Vivawest Wohnen joint venture, see Note (5.3). As a consequence, some of the sales revenues previously generated by the Real Estate segment and the associated material expenses are no longer recognized by this segment. They are now reported by the Vivawest Wohnen joint venture, which is included in the consolidated financial statements at equity. This has not significantly affected the earnings KPIs.
- At the start of 2012 Evonik made a few slight adjustments to its regional reporting structure. Some regions have been renamed and a few countries have been allocated to different regions. The prior-year figures have been restated accordingly.

The table shows a reconciliation from adjusted EBIT for the continuing reporting segments to income before income taxes for the Group's continuing operations:

| in € million   | 1st half     |              |
